
of ReindexFailed task after re-running the 321 implementation script

- **Article Type:** General
 - **Product:** Verde
 - **Product Version:** 2
-

Description:

Each time implementation script no. 321 is re-run, 'ReindexFailedLocalEproductsTask' task is created without checking if the task already exists.

As a result duplicate tasks are created, and in case the original task wasn't customized, the duplicate task has the same parameters (i.e. scheduled to run at the same time).

Creation of duplicate task by re-running implementation script should be corrected.

Resolution:
