## Determine Order of Library's and User's Quick Set Groups in QuickSearch

- **Article Type:** General
  - **Product:** MetaLib
  - **Product Version:** 3
- 

### Description:

How do I determine the order of the library's Quick Sets and the user's own Quick Sets in QuickSearch?

### Resolution:

Defining the order of Quick Sets between library-created and user-created sets is made by a parameter in the table:

`./metalib_conf/www_server.conf`. The parameter is: `setenv www_v_my_sets_order N`, When N stands for:

0 - User defined sets do not appear at all

1 - User Defined sets appear ABOVE Library defined sets

2 - User defined sets appear BELOW Library defined sets

---

## Additional Information

Quick Search, Quick Sets, Presentation
