

Data is duplicated when copying the value of URI field

- **Article Type:** General
 - **Product:** Verde
 - **Product Version:** 2
-

Description:

When copying a value from the URI field (of any attribute – License/Access/Admin), and then pasting the URI to the address line, the copied data is doubled.

For example, in case the value is: "<http://www.google.com>" when you paste it, it will be: "www.google.com www.google.com"
