

log in doesn't work properly after error

- **Article Type:** General
 - **Product:** Verde
 - **Product Version:** 2
-

Description:

When you try to log in after an error occurred with the last login - e.g. wrong password - you have to log in twice before Verde UI opens up.

Scenario:

provoke log in error, e.g. leave password field empty --> Error: A wrong or invalid user name was provided
try to log in again, this time with valid username / password --> log in screen is displayed again, but Verde UI does not open
you have to log in another time with valid username / password --> Verde UI opens
So login doesn't work properly after an error occurred.

Resolution:
