

Publishing Profiles

For a video on setting up a publishing profile, watch [Publishing Profiles](#) (5 minutes).

With publishing profiles ([Resources > Publishing > Publishing Profiles](#)), you can export (publish) records using several methods.

You can create your own general or RSS publishing profiles or edit the built-in publishing profiles that are provided with Alma. Alma provides out-of-the-box publishing profiles for OCLC, Primo Central, Google Scholar, and so forth. These are the profiles that appear when you select the **Built-in Profiles** option from the Publishing Profile Type drop-down list.

To run publishing profiles, you need to configure them as active and select a scheduling option that identifies when you want the system to run your job. For all publishing jobs, except the following, you may also manually run a job by selecting **Run** from the list of actions:

- Publish bibliographic records to Primo
- Publish electronic records to Central Discovery Index
- Publish bibliographic records to Summon
- Publish electronic records to Summon
- Publish electronic records to Google Scholar
- Publish bibliographic record (DataSync) to OCLC
- Publish your Local Holdings Records (LHRs) to OCLC
- Publish electronic records to Central Discovery Index

7	<input type="checkbox"/>	Publish researchers profiles to Google	Publish researchers profiles to Google	-	...
8	<input type="checkbox"/>	Publish holdings to Libraries Australia	Upload Holdings to Libraries Australia	-	...
9	<input type="checkbox"/>	Publish your Local Holdings Records (LHRs) to OCLC	Make your library's Local Holdings Records (LHRs) accessible through WorldCat	-	...

The screenshot shows a table with three rows. The third row is selected, and a context menu is open over it. The menu items are 'Edit', 'History', and 'Run'. The 'Run' button is highlighted with a red box.

Run a Publishing Job

For more information, see the following sections:

- [Publishing and Inventory Enrichment \(General Publishing\)](#) – This section describes how to add and configure general publishing profiles.
- [Publishing Research Assets](#) – If Esploro is enabled for your institution, you can publish your research assets.
- [Resource Management](#) – This section provides links to the configuration instructions for out-of-the-box publishing profiles.
- [RSS Publishing](#) – This section describes configuring an RSS feed publishing profile.
- [Excluding Resources with Specific Process Types from Publishing](#) – This section describes how to exclude records with specific process types from being published.

For information regarding the data that was published using certain publishing profiles, see [Publishing Information](#).
