

## Shared Dimensions

Shared dimensions are shared across more than one subject area. They are created for efficiency (both from a development perspective and from a user perspective) and are necessary in order to create cross subject area reports. For information on creating reports from more than one subject area, see [Creating Advanced Custom Reports](#).

This chapter describes in detail all shared dimensions, including where they are used and the list of fields that they contain.

Shared Dimensions

Shared Dimension Name	Exists in the Following SA
<a href="#">Bibliographic Details</a>	Funds Expenditure, e-Inventory, Fulfillment, Lending Requests, Borrowing Requests, Physical Items, Requests, Course Reserves, Link Resolver Usage, Purchase Requests, Digital Inventory
