## OvP: My Account / Personal settings: "Valid to date" is empty

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Question

The "Valid to date" on personal setting is not the Aleph expiry date because it is empty.  
Where does it come from?

---

### Answer

The 'Valid to' date is the information, how long the address information is valid (contact.address\_valid\_to = Z304\_DATE\_TO) ; not the patron expiry date.

The information is identical in the Aleph address information and in Primo display.

---

### Additional Information

Example of an Aleph address with empty "Valid to date".

```
02 z304_rec_key \  
03 id .....XXXXXXXXXXXXXXXXX  
03 sequence .....01  
02 z304_address[0] ..... Ms. Jane Doe  
02 z304_address[1] ..... Information Services  
02 z304_address[2] .....  
02 z304_address[3] .....  
02 z304_address[4] .....  
02 z304_zip .....  
02 z304_email_address ...Jane.Doe@exlibrisgroup.com  
02 z304_telephone .....47111213  
02 z304_date_from .....20080212  
02 z304_date_to .....00000000 <<<<<<  
02 z304_address_type ....02  
02 z304_telephone_2 .....  
02 z304_telephone_3 .....  
02 z304_telephone_4 .....
```
