

Aleph/ARC discrepancy in order local price and number units

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

Discrepancy between Aleph and ARC regarding data for the order ABC123456

According to ARC this has 6 units, local price 161.7

According to Aleph this has 2 units, local price 37.68

Cause:

Wrong package 'Acquisitions Orders' for report

Resolution:

Use package 'Acquisitions Budgets' for the report.

Additional Information

Whenever budget/invoice information is involved, please use package 'Acquisitions Budgets'; whenever the aim is to query order information, please use 'Acquisitions Orders'.
