

## What versions of Voyager are supported on Windows 10?

- **Product:** Voyager
  - **Product Version:** 9.2.1
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

What versions of Voyager are supported on Windows 10?

### Answer

Windows 10 is supported for Voyager 9.2.1 (in General Release as of 07 June 2016) and higher.

---

#### Note

"Supported versions" for a particular Windows operating system are those versions of Voyager that have been tested on that specific version of Windows. Voyager may run on a Windows version for which it is not explicitly supported; but until Ex Libris tests Voyager on that platform, Support has limited knowledge of any potential compatibility issues or resolutions for those issues.

---

### Additional Information

Note that Voyager's Analyzer extension module is not fully compatible with Microsoft Edge browser. An alternate browser is recommended.
