## file-03 for z100; tables which file-03 can't handle

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

|

### Description

The file-03 Service for the z100 table doesn't work: the `./files/z100.seq` file has no data, only this error message: "ORA-01489: result of string concatenation is too long." It seems there are certain tables which file-03 can't handle.

### Resolution

The z100 has been added to the list of files (seen in `$aleph_proc/p_file_03_1`) which file-03 doesn't handle:

```
if ($p_table_name == z110 | \  
$p_table_name == z05 | \  
$p_table_name == z130 | \  
$p_table_name == z131 | \  
$p_table_name == z300 | \  
$p_table_name == z00r | \  
$p_table_name == imgtab_b | \  
$p_table_name == imgtab_f | \  
$p_table_name == tmptable | \  
$p_table_name == z00p | \  
$p_table_name == z100 | \  
$p_table_name == z301)  
then
```

This will be a v22/v23 rep\_change (fix request 401)
