
GUI, Mail - Add secure SMTP support for TLS1.2/SSL3.2.

- **Product:** Aleph
 - **Product Version:** 20, 21
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

GUI, Mail - Add secure SMTP support for TLS1.2/SSL3.2.

Cause:

Defect

Resolution:

Adding a support for TLS and SSL configurations of SMTP server. The default is 'NONE', which is no TLS/SSL support. Fixed with rep_change #002544 in version 21.1.5

Additional Info

In order to activate the new functionality, the following entry should be added in .AlephcomTabAlephcom.ini under mail section: [Mail] ; ;There are 3 options for SecureConnection type: ; ; NONE ; SSL ; TLS ; ;The default is SecureConnection=NONE SecureConnection=NONE It is recommended to use AlephAdm module to configure the mail parameters.
