

## MAX-NO-LIBS license value; \$DEMO\_LIBS

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

When the system counts libraries to compare to the MAX-NO-LIBS \$aleph\_tab/license value, does it include the usm01, usm10, etc.?

### Answer

No, it does not.

1. Do “echo \$aleph\_libs”
  2. Do “echo \$DEMO\_LIBS”
  3. Subtract the libraries in #2 from those in #1. These are the libraries counted against MAX-NO-LIBS.
