
publish-06 "from-last-handled-date" doesn't work following Aleph upgrade

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

After upgrading from Aleph 20 to 21, publish-06 with 'From last handled date' doesn't create any tar file. There **are** z00p (Publishing) records which have been added since the last run.

Cause:

Failure to copy \$aleph_root/tab/tab_publish_timestamp from old version to new. (Upgrade Express copies u-tree files only, no a-tree files.)

Resolution:

Copy \$aleph_root/tab/tab_publish_timestamp from version 20 to version 21.
