

Multi-ADM file-20: z353 sometimes not created

- **Product:** Aleph
 - **Product Version:** 20, 21, 22
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

When a patron has a z305 for one ADM, and a z305 is loaded for another ADM, the z353 (patron index) entries are sometimes not created.

Cause:

Defect.

Resolution:

Corrected by v22 rep_change 2132, included in the 22.1.1 Service Pack.
