
Enable Pop-up (block) for patron overdue limits during loan

- **Product:** Alma
-

Question

Why are patrons with overdue items not getting blocked during loan (charge), when "Patron Limits" table has value of "1" for Maximum Overdues?

Answer

To block a loan already upon the first overdue item (or overdue recall), use the value of **zero ("0")** when configuring "Max Overdues".

This parameter is defined under:

Configuration > Fulfillment > Patron Configurations > Patron Limits
