

## Different results when searching the abc01 (BIB) and abc60 (HOL) libraries

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Problem Symptoms:

Different results when searching the abc01 and abc60 libraries ( with your library's 3-letter code)

### Resolution:

“last-word-number” counter in the xxx60 library needs to be reset

1. Run the following SQL in xxx60:  
select max (Z97\_REC\_NUMBER) from z97;
2. Select UTIL-G-2:
3. NEW
4. Enter sequence name: last-word-number
5. Enter sequence start number: whatever number get from SQL above; Set leading zeros to "N".
6. Enter prefix for format:
7. Do you want to suppress leading zeroes (y/n): y?
8. Confirm (y/n) y
