
Batch jobs fail with "invalid username/password; logon denied" message

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description:

We have used util y/8 to change the passwords for all of our Oracle users. This works fine for all of the Oracle users except aleph_admin. When we change the aleph_admin password and then try running a GUI service, we get the following errors:

```
Enter user-name: ERROR:  
ORA-01017: invalid username/password; logon denied  
Enter user-name: SP2-0306: Invalid option.
```

Resolution:

See article: p_manage_05 stalls; "invalid username/password; logon denied"
