
tab_filing_call_no recommendations for version 20-up *MASTER*

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description:

We plan to run p_item_06 after we update our tab_filing_call_no table in abc50. Can I get the current recommendation on the settings for LC, Dewey, and SuDocs for Aleph 20?

Resolution:

For LC (based on KB 6545 for v.18):

```
0 L del_subfield
0 L to_blank &()-[]<>?,:/
0 L lc_call_no
0 L add_call_no_type
0 L pack_spaces
```

For Dewey (based on KB 9591 for v.17):

```
1 L del_subfield
1 L dewey_call_no
1 L add_call_no_type
1 L pack_spaces
```

For SuDoc number (extrapolating from 3690 for v. 18)

```
!* Gov_doc Numbers
3 L del_subfield
3 L to_lower
3 L expand_num
3 L to_blank :.-
3 L add_call_no_type
3 L pack_spaces
```
