

## How to Define process status

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description:

When I go to list of items in cataloging GUI and choose "bind" the items get bound into a new item, and automatically get the process status "BD".

But then when I update the item, I get the message "Invalid process status".

### Resolution:

This is because you do not have BD process status defined for the specific sub library. Add it to tab15.lng in \$data\_tab of the ADM library, and message will not appear.
