

Leganto Release Notes April 2016

New and Changed Leganto Features

The following features are new or changed in this month's release of Leganto:

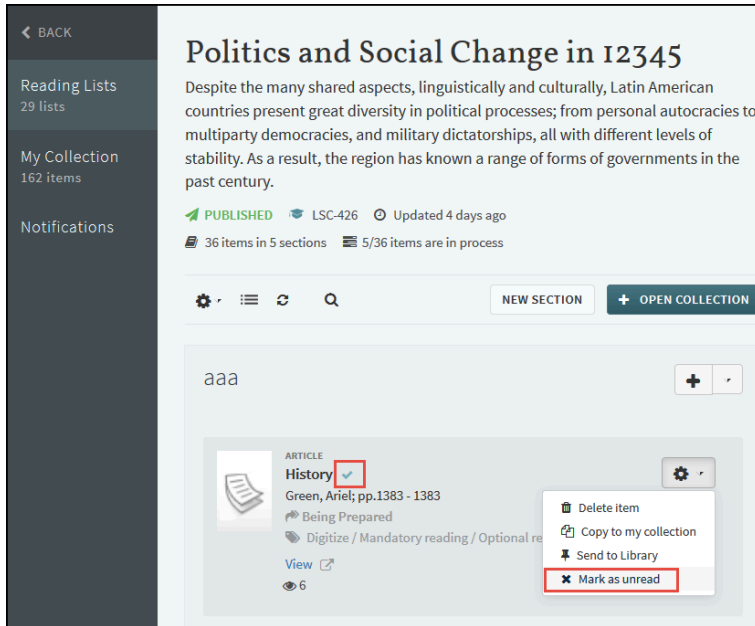

Mark Citation as Read

A student (or any other user) can now mark a citation as read. Select **Mark as Read** from the citation management menu.

Reading List - Mark as Read

A check mark appears beside the citation title. To mark as unread, select **Mark as Unread** from the citation management menu. The check mark is removed.

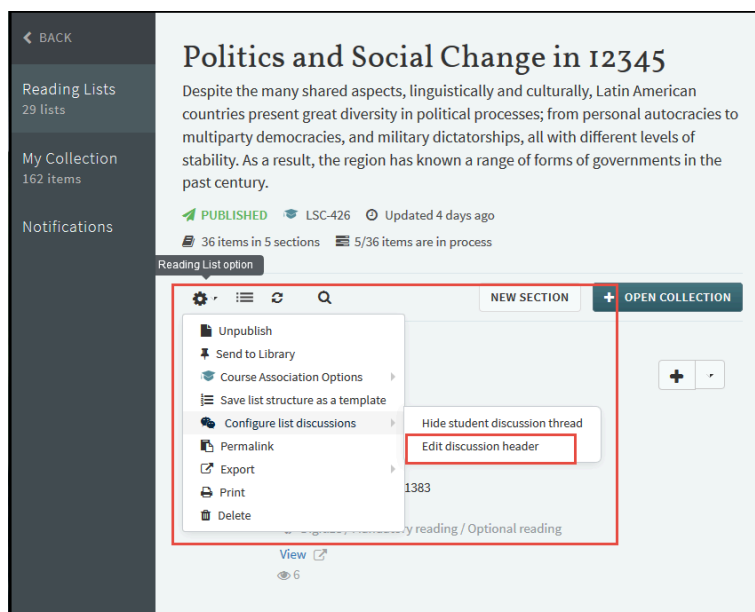

Reading List Page - Mark as Unread

Configure Citation Discussion Note Headers

You can now configure the heading paragraph that appears above all citation discussion threads in a reading list. You can configure a different heading for each reading list.

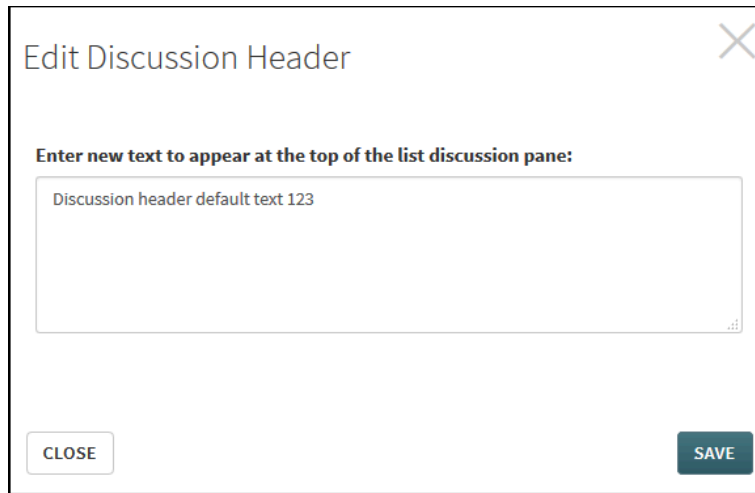

To configure the heading for all citation discussions in a reading list:

1. On the reading list page, select **Configure List Discussions > Edit Discussion Header** from the reading list management menu.

Reading List Page - Edit Discussion Header

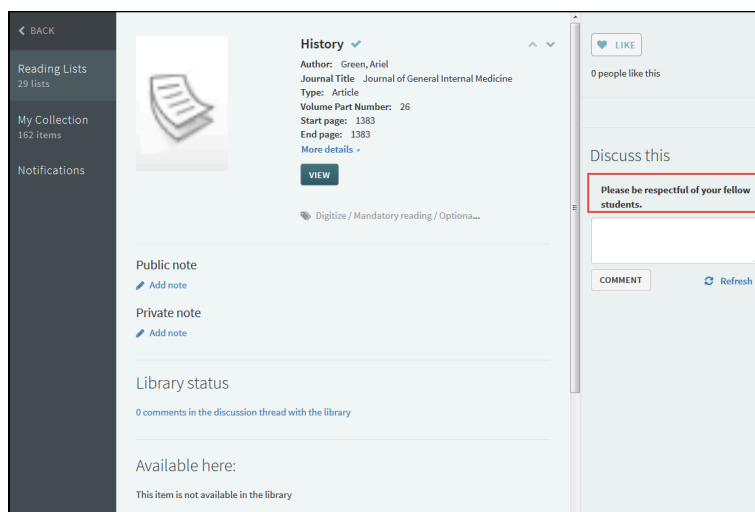

The Edit Discussion Header pane appears.

Edit Discussion Pane

2. Enter the desired header in the pane and click **Save**.

The text that you entered appears over the discussion on every citation page in the reading list. In the following example, you entered the text `Please be respectful of your fellow students.`

Citation - Discussion Header

See [Alma Configurations](#) for additional configurations for the discussion header.

List of Supported Cite It! Sites

The list of sites that are guaranteed to work with Cite It! appear in **User menu > Leganto Cite It!**

Leganto Cite it!

The Leganto Cite It! bookmarklet allows you to collect resources while browsing the web.

To install it simply drag and drop the below link to your bookmarks panel.

CITE IT!

Supported sites:

- ACS Publications
- Aip
- Alexander Street
- Amazon
- American Meteorological Society

CLOSE

Cite It! Pane

Cite It! can still be used on any web site, but its ability to identify citation information varies from site to site.

Upload Citations to Section

In addition to uploading a list of citations in RIS format to a reading list, you can now upload an RIS file directly to a section.

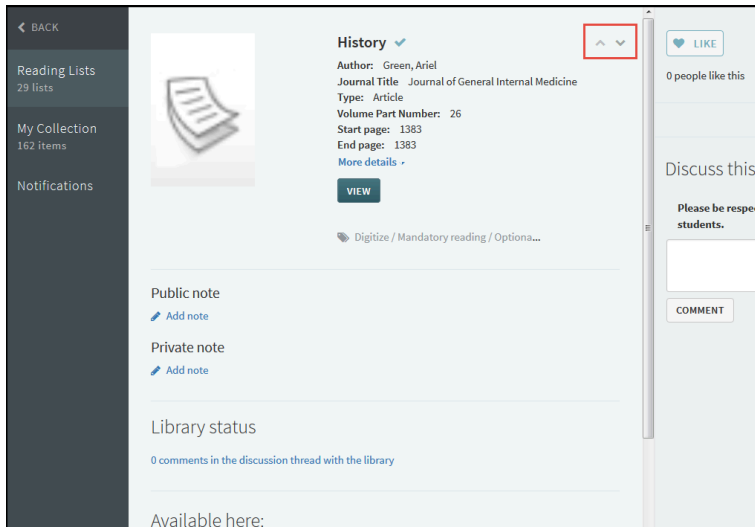

The screenshot shows a reading list interface. On the left is a dark sidebar with navigation options: 'Reading Lists' (29 lists), 'My Collection' (162 items), and 'Notifications'. The main content area is titled 'Politics and Social Change in 12345'. Below the title is a description: 'Despite the many shared aspects, linguistically and culturally, Latin American countries present great diversity in political processes; from personal autocracies to multiparty democracies, and military dictatorships, all with different levels of stability. As a result, the region has known a range of forms of governments in the past century.' Below the description are status indicators: 'PUBLISHED', 'LSC-426', and 'Updated 43 minutes ago'. At the bottom of the main area, it says '36 items in 5 sections' and '5/36 items are in process'. A toolbar contains 'NEW SECTION' and '+ OPEN COLLECTION' buttons. Below the toolbar, a section titled 'aaa' is visible. A citation card for 'ARTICLE History' by 'Green, Ariel; pp.1383 - 1383' is shown. A context menu is open over the citation card, with the 'Import RIS file' option highlighted in red. Other menu options include 'Edit Section', 'Send to Library', 'Copy section', 'Export', 'Print section', and 'Delete section'.

Reading List Page - Upload to Section

Previous/Next Citation Arrows

You can now navigate between citations in a reading list by clicking the previous/next arrows while viewing a citation. Click

the up arrow to view the previous citation and the down arrow to view the next citation.

Citation Page - Previous/Next Arrows

Additional Leganto Features

The following additional features were added to Leganto in this release:

- Addition citation types are available when adding a citation manually.
- When performing a library search (in Alma) in Leganto, suppressed items are no longer returned. For additional changes related to locating items for citations in the inventory, see the item's marked **New for April** in [Matching a Citation's Attachment to an Inventory Item](#).

Alma Configurations

The following features were changed or added to support Leganto features. For additional changes related to courses and reading lists, see the *Fulfillment* section of the [April 2016 Alma Release Notes](#).

- To enable/disable discussion headers in all reading lists, configure the customer parameter **discussion_header_enabled (true/false)**.
- To set the default value of the discussion header for all reading lists, configure the customer parameter **discussion_header_default_text**. Enter the text you would like as the default.

Resolved Issues

The following issues were resolved in this release of Leganto.

- (URM-56320) There was a problem with adding citations from Cite It! to duplicated reading lists. This was fixed.
- (URM-55746) The Welcome Wizard now displays the course name as well as the course code.
- (URM-55467) A reading list permalink sometimes linked to Leganto's main page instead of the reading list. This was fixed.

- (URM-55317) Leganto's header and banner did not appear when inside an IFrame. This was fixed.
- (URM-55229) Citation metadata that appears in a Primo search is now taken from its Alma bibliographic record, if any.
- (URM-54570) The list of citation types was not sorted alphabetically. This was fixed.
- (URM-52724) The suggestions for collaborators included all users. This was fixed, and the suggestions for collaborators now includes only users with one or more of the following roles: **Instructor**, **Fulfillment Services Operator**, **Fulfillment Services Manager**, **Course Reserves Operator**, or **Course Reserves Manager**.
- (URM-55713) **Send to Library** was disabled in the citation management menu. This was fixed.
