## p\_ret\_adm\_01: "if: Expression Syntax." error

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description:

The location/call number is included in our Course Reserves OPAC Full View for personal/professors' copies (direct link to xxx50 item), but is not included for library-owned copies (linked to via an abc01 record) . Note: we have "PST" specified as the location field in edit\_doc\_999.eng.

### Resolution:

The course-bib-record links are z103\_type ITM links. PST entries for ITM-type links require the following line:

```
WEB-FULL expand_doc_bib_loc_1_b2
```

The regular ADM-type links are generated by the

```
WEB-FULL expand_doc_bib_loc_1_b
```

The b2 should be immediately after the b, like this:

```
WEB-FULL expand_doc_bib_loc_1_b  
WEB-FULL expand_doc_bib_loc_1_b2
```

**Note:** The same problem can occur in the Course OPAC Brief List if the

```
WEB-BRIEF expand_doc_bib_loc_1_b2
```

is missing.
