

Batch loading charges into Aleph

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description:

Is there a process to batch a load of external charges into Aleph. I see where we can add cash transactions to existing charges but we'd like to create new charges and post them to the patron records.

Resolution:

p_cash_10 exports cash transactions to the bursar (or accounts receivable).

p_cash_11 imports updated (paid) cash transactions from the bursar (or accounts receivable).

As you suggest, p_cash_11 expects there to be an existing Aleph z31 cash transaction to be updated. There is no service which can be used to import brand-new cash transactions.
