

SQL showing number of items for each sublibrary/collection combination

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

We need to know how many items there are for each sublibrary/collection combination.

Resolution

The following SQL script will do that:

```
set echo off
set pause off
set term off
set show off
set feed off
set verify off
set heading off
set pagesize 58

spool items-count.lst

select /*+ DYNAMIC_SAMPLING(2) ALL_ROWS */ z30_sub_library, z30_collection,
count(*) from z30 group by z30_sub_library, z30_collection order by
z30_sub_library, z30_collection asc;

spool off
exit
```
