## Times between 24:00 and 24:59

- **Product:** Alma
- 

### Question

In the job history we see strange times between 24:00 and 24:59.

What does a time 1 March 24:30 mean? Is it in the first hour of 1 March or after midnight and actually on 2 March?

### Answer

1 March 24:30 is the same as 1 March 00:30.

You may change the time format from displaying times between 01:00 and 24:59 to displaying times 00:00 to 23:59:

1. Configuration > General > General Configuration > Other Settings > system\_time\_format

2. Update time format from  to

Note that this will change the display of times in your job history. It will not cause any functional change.

### Additional Information

Parameters for system\_time\_format:

Parameter	Value
a	am / pm marker
H	hour in day (0-23)
h	hour in am / pm (1-12)
k	hour in day (1-24)
K	hour in am / pm (0-11)
m	minute in hour

Parameter	Value
s	second in minute
S	millisecond
z	general time zone (e.g., PST)
Z	RFC 822 time zone (e.g., -0800)
