

Count of items or titles by collection

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

How can we get a count of the number of A) items or B) titles for each collection?

Resolution

A) To get a count of the number of items for each collection:

```
> s+ xxx50
```

```
SQL> select z30_sub_library, z30_collection, count(*) from z30 group by z30_sub_library,  
z30_collection;
```

B) To get a count of collections by bib/hol record:

1. Build USER-DEF-n fields in the xxx60 tab22 to generate z13u table entries. For example:

```
USER-DEF-1 1 852## b  
USER-DEF-1 1 852## c
```

2. Run manage-07 for xxx60;

3. Create a script collection_count.sql:

```
set echo off  
set pause off  
set term off  
set show off  
set verify off  
set heading off  
set feed off  
spool collection_count.lst  
select z13u_user_defined_1, z13u_user_defined_2, count(*) from z13u group by  
z13u_user_defined_1, z13u_user_defined_2;  
spool off
```

exit

4.

> s+ xxx60

SQL> @collection_count.sql
