

RDA field 419 (MAB, RDA format) not sent by EDI

- **Product:** Aleph
 - **Product Version:** 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

EDI: Imprint is missing when sending orders after changing to RDA format

Resolution

EDI ordering was enhanced in Aleph 22.

Rep_change #2249

Description: When the MAB environment is set to RDA format, the imprint is missing from EDI messages.

Solution: This has been corrected. Now the imprint information will be taken as an alternative from field 419 (used in RDA) **if none of the fields 410, 412 and 425 (with the information in non-RDA format) exists.**
