

## No message when due-date shortened to patron expiry date

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

If the return date exceeds the borrower's expiration date (z305\_expiry\_date), the return date falls back to the expiry date without any warnings to the staff. Is it possible to get such a warning ?

### Resolution

The variable involved in this is the xxx50 tab100 BOR-EXPIRY-DUE-DATE parameter. The pc\_cir\_c0441 (loan) program unconditionally calls the fix\_due\_date routine. fix\_due\_date -- among other things -- checks if the tab100 BOR-EXPIRY-DUE-DATE is not set to "N". If not, then it performs the FIX-EXPIRY-DATE routine, which checks the proposed date against the suggested date, and, if appropriate, calls the CORRECT-DUE-EXPIRY-DATE routine to change the due-date to the expiry date.

Neither the pc\_cir\_c0441 nor the fix\_due\_date program produces a message in this situation.

This would be an enhancement request.
