 - **Relevant for Installation Type:**
-

Question

We wrote an easy normalization rule to remove the field 003 from each record:

```
when  
(TRUE)  
then  
removeField "003"  
end
```

It does not work. Why is that?

Answer

Instead of

```
removeField "003"
```

please use

```
removeControlField "003"
```
