

Why is publishing not running at the scheduled times?

- **Product:** Rosetta
 - **Product Version:** 4
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

Why did publishing stop running at the scheduled times?

Answer

Publishing does not run if scheduled too frequently.

Rosetta will not run 2 publishing jobs at the same time, therefore a gap should be scheduled between the jobs

Additional Information

NOTE: Rescheduling publishing should be for at least 30 minutes from the current time, to allow the system run it on time.
