## Wrong book cover thumbnail displayed in Alma

- **Product:** Alma
- 

### Description

Thumbnail display was activated for the Alma search results list, but an incorrect thumbnail is displayed, showing the cover of a different book.

### Resolution

These images are imported from Google Books using the title's ISSN, ISBN, or LCCN. If the identifiers in the Alma record are correct, it is likely that the cover image is wrong in the source.

If this is the case, you may want to contact Google Books in order to inform them about the error: <https://support.google.com/websearch...hooter/6113172>
