

## Number of records to display in full view

- **Product:** Aleph
  - **Product Version:** 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

In the GUI Search when the number of results is five or fewer, it displays the results immediately in full view. But when the number of results is greater than five, it displays the results list and user needs to click on "Show" in order to see the results in the top frame. Can the number of records be changed e.g. Show in full view when there are up to 10 records?

### Answer

The value can be changed client file .\alephcom\tab\alephcom.ini:

```
[SearchFind]
```

```
AutoShow=5
```
