
print-08 - Delimiter between title and author?

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

Is it possible to add a delimiter between title and author when both fields appear in one column (from 245##a and 245##c) when running "Print Catalog Records - Columnar Format (print-08)"?

Example:

245##aIntegrated marketing communication

245##cRobyn Blakeman

should be "Integrated marketing communication, Robyn Blakeman" in the print-08 column.

Yes, this is possible with the following configuration:

xxx01/tab/rep_tab_short.eng

```
006 L Title,Author 245## 035 02 C01 --- Y
```

xxx01/tab/edit_field.eng:

```
1 # 245## S
```

```
2 a
```

```
2 c ,
```
