

Changes in text for printouts of field item process status

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

For specific printouts (hold-request-letter) the text for Item Process Status OR, BD, BL, IP or CT should be translated differently.

Cause:

File hold-request-letter.trn is missing

Resolution:

Create a file `./xxx01/form_ing/hold-request-letter.trn` file for the translation of text in form hold-request-letter

Example `xxx01/form_ing/hold-request-letter.trn`
adding the following line for translating the statuses
`item-p-statuses TEXT OR=On_Order BD=Bound CT=Cataloging`
etc.

Additional Information

To implement a condition in the form, you will have to create a check in the `*xsl` file.
Please consult document [The "XSL Creator"](#) in
[Documentation Center > Ex Libris Documentation Center > Aleph > Technical Documentation > How To > Printing](#)
or any other document describing `*xsl` editing.
We usually do not support the creation of new `*xsl` files or special conditions.
