

Access to OAI data

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

In the `./alephe/tab/server_ip_allowed` table, is it necessary to allow access to x-server in addition to www servers for OAI data provider?

Answer

OAI is part of the Web server. If needed, the access should be set up for "W" (www_server) in `./alephe/tab/_server_ip_allowed`.

Additional Information

Example of an OAI request:

```
<www host>:<apache port>/OAI?<oai request>
```

<http://il-aleph20:8991/OAI?verb=ListSets>
