

PDS opens with parameter '&institute=USM50'

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

PDS opens with parameter "institute=USM50"

Cause:

DEFAULT-BOR-LIBRARY in BIB xxx01 library tab100 was defined as "USM50".

Resolution:

Set ./xxx01/tab/tab100/DEFAULT-BOR-LIBRARY= to your ADM library:

```
DEFAULT-BOR-LIBRARY=ABC50
```

Additional Information

The parameter in the Web page is "institute=\$0200" in ./www_f_eng/pds-login. Instead of \$0200 it could be changed to the ADM library, in a single-ADM environment.
