

## Results List button after Browse Search

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Question

When using Results list after Browse, the last result that was open in Full view is displayed in Brief view.

### Answer

This is a known system behavior.

Use the browser Back button to get the complete Brief list

### Additional Information

When displaying Brief list and selecting a record in Full view, then use "Results lists", the Brief list is displayed again but it starts with the record that was just displayed in Full view.

In order to see also the previous records from the brief list click "Previous Page".

Use the browser Back button to get the complete Brief list.
