

STA field in holdings records XXX60

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

When Holding record in XXX60 has field STA with ANY content, the Holding record is suppressed from display in the Holdings frame in the OPAC Items list .

This should only happen when STA field = SUPPRESSED or DELETED. But we found that this happens when any STA field is present in XXX60 record.
