

Viewing AUT information in the OPAC

- **Product:** Aleph
 - **Product Version:** 22
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

Adding a new AUT library and connecting BIB records with AUT records works fine but in the OPAC in the service the AUT information (fields from the AUT record) is not displayed.

Resolution

A file xxx01/tab/edit_doc_aut_xxx10.lng is missing which contains the fields from the AUT record that should be displayed. Add the table and restart the WEB server. Example can be found in standard environment USM01 or MAB01.
