## -b parameter in PpatronExpX triggers outofbounds java error

- **Product:** Voyager
  - **Product Version:** 9.1.1-9.2.0
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local
- 

### Symptoms

Using the -b parameter with any argument in the PpatronExpX job results in a java error.

### Defect Status

VYG-6772 is resolved for Voyager 9.2.1 and higher.

### Replication Steps

1. Format a PpatronExpX command, something like PpatronExpX -r1-3 to get the first 3 patron records.
2. Job completes successfully.
3. Run the command again with the -b parameter: PpatronExpX -r1-3 -b (no argument defaults to add).
4. Job does not start and the log shows something like:

```
5. 2015-08-13 13:00:02,186 1 [main] ERROR com.exlibris.voyager.patron.importExport.PatronExportMain - 8
java.lang.ArrayIndexOutOfBoundsException: 8
at com.endinfosys.util.ParmsImpl.doCharArgv(ParmsImpl.java:594)
at com.endinfosys.util.ParmsImpl.processArgv(ParmsImpl.java:642)
at com.endinfosys.util.SimpleApp.initParms(SimpleApp.java:149)
at com.endinfosys.util.SimpleApp.<init>(SimpleApp.java:110)
at com.endinfosys.voyager.util.SimpleClient.<init>(SimpleClient.java:57)
at com.exlibris.voyager.patron.importExport.AbstractImportExportClient.<init>(AbstractImportExportClient.java:44)
at com.exlibris.voyager.patron.importExport.PatronExportMain.<init>(PatronExportMain.java:77)
at com.exlibris.voyager.patron.importExport.PatronExportMain.main(PatronExportMain.java:180)
```

### Workaround

Don't use -b for XML export
