

"Synchronize changes" job fails every Saturday

- **Product:** Alma
 - **Product Version:**
 - **Relevant for Installation Type:**
-

Description

The job "Synchronize changes from CZ" fails every Saturday (resp. in the night from Saturday to Sunday).

Resolution

This is a known problem. On Saturday the CKB updates take place, so the CKB is often not available at the time when the job is scheduled. The synchronisation will take place at the next day, so there is no reason to worry.
