

gzip: No match

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

The message "gzip: No match" appears in an import log, such as the `impdp_on_two_task` log or the `install_customer_data` log.

The message may be followed by other errors, such as:

```
ORA-39001: invalid argument value
ORA-39000: bad dump file specification
ORA-31640: unable to open dump file "/exlibris/upgrade_express_2101_2201/data/a20_2/
xxx00/files/dpdir/xxx0001.dmp" for read
ORA-27037: unable to obtain file status
Linux-x86_64 Error: 2: No such file or directory
```

Resolution

"gzip: No match" indicates that, in executing an unzip command (such as, "gzip -d"), gzip has either: (a) not been able to find a file with the specified name in the specified location or (b) found the file, but it is not in gzip format.
