

## Client crash when connecting to specific library

- **Product:** Aleph
  - **Product Version:** 20
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Problem:

When trying to connect to a specific library the cataloging client crashes. It was noticed that the crash only happens when a fix is added to table xxx01/pc\_tab\_catalog/fix\_doc.*lng*.

### Cause:

Number of lines in table fix\_doc.eng is limited to 50.

### Resolution:

Reduce the command lines in xxx01/pc\_tab\_catalog/fix\_doc.*lng*. Only 50 lines are allowed.
