

BIB Info on Order List

- **Product:** Aleph
 - **Product Version:** 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

How to modify the fields from the BIB record information that are displayed in the order list?

Answer

The display is configured in tables ...

`xxx50/pc_display_lng/bib-info`

`xxx50/tab/bib_format`

`xxx01/tab/edit_paragraph.lng`

Please see the attachment [bib info on order list](#) for detailed information.

Additional Information

If there is a format 'default' listed in file `./xxx50/tab/bib_format`, it has to be listed at the end of the file, otherwise 'default' will be taken instead of bib-info.
