

Oracle configuration changes when changing server name

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

When changing a server name, what configuration changes need to be made regarding Oracle?

Resolution:

In the file system, the server name appears (and should be changed where relevant) in the following files:

\$ORACLE_HOME/network/admin/listener.ora
\$ORACLE_HOME/network/admin/tnsnames.ora

The following parameters in the Oracle database should be updated as well:

DB_DOMAIN
SERVICE_NAMES
