

EDI Object Code

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

When loading EDI invoices, "EDI" is inserted in the object code field.

Answer

If the `./xxx50/tab/tab100 USE-OBJECT-CODE` is set to "Y", then the EDI program moves "EDI" to the line Item object code (`Z75-I-OBJECT-CODE`).
