
Subfield punctuation saved, then lost

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Desired Outcome Goal:

Add end punctuation to authority-controlled fields.

Procedure:

1. Add "e" to col.4 in ./xxx01/tab/tab_subfield_punctuation, as follows:

```
! 2      3 4 5          6  
  
!-!!!!!!-!-!-!!!!!!-!!!!!!  
A 7#### a e .          -) . ,
```

2. Restart PC server

3. Restart ue_01 (util e/2 , util e/1) in XXX01.

Additional Information

Subfield punctuation added to field 710 subfield a, followed by subfield e. Only subfield a was controlled by authorities. After saving, punctuation was saved. Then removed by ue_01 fix_doc_ref_1. Adding subfield e to col.4 of ./xxx01/tab/tab_subfield_punctuation solved the issue.
