

## expand\_doc\_split and expand\_doc\_duplicate\_field

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

Programs expand\_doc\_split and tab\_expand\_split delete the original field, and create virtual fields.

### Resolution

In order to retain the original field use duplicated field created by expand\_doc\_duplicate\_field (and tab\_expand\_duplicate\_field)

See Aleph 22 System Librarian Guide - Indexing, page 71.
