

Parallel indexing: Word Index corrupted

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Problem Symptoms:

- * During parallel indexing Rebuild Word Index (manage-01) word indexing was corrupted
- * Search stopped

To validate this is the problem:

- * Go to the proper (bibliographic) database.
- * SQL request:

```
SQL> select_count (*) from <BIB Library code>01.z97;
```

```
ERROR at line 1:
```

```
ORA-24333: zero iteration count
```

- * Run the same query for z95, z97,z98, z980 to find corrupted indexes.

Cause:

corrupted file_list

Resolution:

1. Correct the structure of the tables /exlibris/aleph/u20_1/<BIB Library code>07/file_list and /exlibris/aleph/u20_1/<BIB Library code>01/file_list
2. If soft links are missing in the file_list, rerun service Rebuild Word Index (manage-01)
