## Authority 680 field and "Include Expanded AUT Data"

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Problem Symptoms:

In xxx01 when "Include Expanded AUT Data" is ticked, only subfield \$a of the authority record 680 field displays in the Browse list, subfield \$i is missing.

### Cause:

The xxx01/tab/edit\_field.eng. There is an entry for 6### and subfield i is missing:

```
1 # 6#### # -w2689
2 a ^
2 b A ^
2 c A ^
2 d A ^
2 f A ^
2 k A ^
```

### Resolution:

Add subfield i in this constellation or edit another entry above only for tag 680 with both subfields.

You can enter subfield i or edit another entry above only for tag 680 with both subfields. Then subfield i should be shown in browse list.

### Additional Information:

The fields which are displayed in the browse list for AUT indexes are hard coded. According fields are

260  
664  
666  
680
