

Deletion of PAR links

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Question

When deleting a record where a PAR link points to and the upcoming warning is ignored the Z103 records remain for both records (the one with the PAR link and the one where the PAR link points to). Also in OPAC when you display the record with the PAR link and move from there using the link field to the linked record a record will be displayed although it's already deleted.

Answer

Unfortunately there is no solution for this.
